

Sophisticated...yet simple.

Protecting you and your property for over 30 years.

When Protection Is All That Matters

Keep intruders out by bringing security protection to both indoor and outdoors with a Paradox security system. Our mission is to provide our customers with a personalised service and innovative technology. Paradox offers management, control and convenience right at your fingertips. Providing 24/7 protection for you, your family and your property whether you be away or at home.

Away from home

When you leave your home, maximise your security with a push of a button. Each of up to 32 points of detection, like your front door, windows, balcony and motion detection devices, will immediately alert you in the case of an unrecognised breach. This invisible barrier not only provides you with complete security, but with the peace of mind that your family, your home and your belongings are safe.

Security while you sleep

Now your main floor can be completely protected while you sleep in full security upstairs. Your front and back doors, windows, balconies and any other points of detection that you choose can be on full alert while your family is free to roam the upper level of your home without setting off an alarm. When you're ready to come downstairs, remove the arming mode with a touch of a button.

Home alone

Give yourself peace of mind knowing that you are safe, even when you are home alone. Whether you're upstairs relaxing in a bath or downstairs playing with the children, you can't always hear what's happening on the main floor. Paradox can secure your perimeter points of detection and keep your living space unarmed.

Wireless security

Paradox can provide your home with maximum security without the need for the installation of cables. The convenience of a wireless security system also means your system can always move with you, so you can secure your home or apartment even if you plan on buying something else later.

Insite Gold Mobile Application for Internet Connected Devices

The Insite Gold mobile application enables you to remotely access your Paradox security system via your mobile device*.

- ▶ Smartphone or internet connected device (iOS or Android)
- ▶ Arm and disarm the system
- ▶ Activate outputs to operate devices such as the garage door or home automation devices
- ▶ Generate panic or duress alarms
- ▶ Be advised when kids get home from school
- ▶ Review alarm conditions
- ▶ Push notifications

It's all the app you need to monitor and control what's going on in your home or business while you're on-the-go, directly from your Mobile device.

**Internet connection required.*

Paradox Keypads

TM70 Touch Screen Keypad

Integrates security and home control capabilities to help you manage and control the complexities of modern living.

- ▶ Icon-based menus with bright colour display
- ▶ System arming, output control. Duress and system conditions easily accessible
- ▶ Upload floor plans onto the inbuilt SD card and locate the alarm zone icons onto the map

K641+ Keypad or K32 LCD+ Keypad

Paradox hardwired keypad modules provide zone alarm display with simplified end-user remote control programming.

- ▶ 32-character blue LCD with programmable labels
- ▶ 3 keypad-activated panic alarms
- ▶ 7 One-touch action buttons
- ▶ Adjustable backlight
- ▶ Displays arm, sleep, stay and disarm status for each partition

K10 LED Keypad

Utilising a LED display this Keypad is a simple interface for controlling your system. Available in horizontal or vertical options to suit most entry locations.

- ▶ Arm, Disarm, Panic and Duress
- ▶ System faults displayed via LED annunciation
- ▶ Ideal for when the iParadox app is being used on a smart device as a secondary, local interface

Security has never been so simple

P ▲ R ▲ D O X™

DG85 or PMD85
Hardwired or wireless outdoor, pet immune, movement detector for open spaces

NV780MX or NV780MR
Hardwired or wireless outdoor, pet friendly, dual curtain movement detector for protecting perimeter walls and windows.

DG457 or G550
Hardwired or wireless glass break detector for 24/7 protection of smashing glass to gain entry.

WD1
Wireless water detector with 24/7 protection against severe damage from floods, leaks or overflows.

DG75 or PMD75
Hardwired or wireless dual movement detector for indoor use protecting spaces up to 11m with pet immunity up to 40kg.

DCT2
Wireless window or door switch for detecting openings when the system is armed or in stay mode.

R910 Reader
Access control reader providing keyless entry to external or internal doors / cupboards.

R915 Reader
Access control reader with inbuilt PIN pad for keyless entry to external or internal doors / cupboards.

NV5
Hardwired indoor movement detector for protecting spaces up to 10m with pet immunity up to 16kg's.

NV35MR or NV45MR
Hardwired or wireless curtain detector with anti-masking for protecting sliding doors, windows, flat screen TV's or artwork.

PMD2P
Wireless indoor movement detector for protecting spaces up to 15m with pet immunity up to 18kg's.

SD360
Wireless smoke detector with inbuilt sounder for early detection of fires.

2WPGM
Wireless relay for garage door control with inbuilt alarm input for hard wiring automation devices to wirelessly communicate with the alarm system.

SR230
Wireless external siren with built-in strobe light for alerting neighbours and indicating to responders which home has had the intrusion.

REM 15 - 4 Button
Wireless remote control for arm/disarm, stay mode, garage door control and auxiliary controls

REM 25 - 5 Button 2 Way
Wireless remote control for arm/disarm, stay mode, garage door control and auxiliary controls with 2 way visual confirmation of actions via inbuilt LED's.

Why Paradox?

-  Smart Phone or Smart Device (iOS or Android) connectivity to your premises
-  Market leading 2-way remote controls with full system feedback in your hand
-  Hardwired, wireless and hybrid systems to meet all installation requirements
-  The smartest user interfaces on the market with the classiest touch screen control centre
-  Configured by Paradox to meet the strict demands of the NZ Security Industry
-  The largest range of wireless detection devices and accessories on the market
-  Back to Base monitoring using 3G network, Internet or Telephone Dialler (may require additional modules)
-  National Broadband Network ready
-  Systems available from 1 to 192 Alarm Zones. From 1 to 999 users.
-  Providing 24/7 protection for you, your family and your property whether you be away or at home.

Back To Base Monitoring

The best way to secure your assets is to have your system report back to a security monitoring centre. Statistics show that 26% of all burglaries happen while we are still inside the building.

In these situations we must rely on our security system to report offsite to a monitoring centre to ensure the safety of our businesses.

Intrusion Alarms, Panic Alarms, Medical Alarms and system conditions can all be reported back to base via the Internet, GSM network, GPRS network or via the traditional telephone line.

As the fibre optic network installation picks up speed across New Zealand, Paradox has many ways to communicate with monitoring centres. Ask your installer for the options in your area.

P ▲ R ▲ D O X™

Paradox have been manufacturing and supplying leading-edge security systems to the world for over 30 years. It's the feedback from all our customers that has helped us design the worlds most flexible yet user-friendly range of security systems available today.
